

Record a one-variable fit test

Blank record. The supplied CAD examples are unprinted and have no validated fit result.

Test date / operator initials / file revision:

Printer / nozzle / material brand and formulation / conditioning:

Slicer version / layer height / orientation / relevant settings:

Mating part and measured size / instrument / resolution:

Acceptance criterion defined BEFORE testing:

Nominal slot	Measured slot	Fit observation	Pass / fail / unknown
10.0 mm			
10.2 mm			
10.4 mm			

Repeat / uncertainty / unexpected result / next change:

Example geometry: plate 30 x 20 x 3 mm; rectangular slot height 6 mm.
Only slot width changes. Record actual printed dimensions; do not assume CAD dimensions equal printed dimensions or that one result generalizes.

This is not a strength, electrical, load-bearing or safety qualification.
No physical measurements have been performed or supplied by HomeForge.
